REASON FOR WITHDRAWAL

Supporting better health for those receiving care is central to Cochrane's mission to promote evidence-informed health decision-making by producing high quality, relevant, accessible systematic reviews and other synthesized research evidence.

The Cochrane Common Mental Disorders Group is currently undertaking a strategic portfolio assessment of all existing and planned reviews and protocols, including those relating to depression.

The planned review outlined in this protocol has not been converted into a full Cochrane Review and has been withdrawn by the Common Mental Disorders CRG from the CDSR. The subject area has been identified for conversion into a full network meta-analysis with the existing author team.

WHAT'S NEW

Date	Event	Description
22 October 2018	Amended	Protocol for a Cochrane Review withdrawn from publication.

HISTORY

Protocol first published: Issue 9, 2010

Date	Event	Description
11 July 2012	Amended	Minor changes to methods.
